## **Abstract**

Till now the details of all the employees of the company were recorded manually so the employee record management was becoming difficult to manage. Employee details such as personal details, Monthly Attendance and Salary information used to be added and updated frequently so management of data became difficult day by day.

The purpose of the Employee Payroll Management System is to automate existing manual system by the help of computerized equipment and full-fledged computer software, fulfilling the requirements.

The Employee has to register himself to get a username and password. Then employee can always login using that username and password. Employee can view his attendance and income information in his account. Adding Monthly Attendance of each employee and updating Salary details is done by Admin.

## **Introduction**

Employee Payroll Management system is platform which provides facility to record Every Detail of employee in the system.

The project of creating Web Application on Payroll Management System is created using PHP. For the development of frontend pages, HTML, CSS and Bootstrap is used. To Store User Data and manage the backend, MySQL is used.

# Software Requirement Specification

## Users:

1. Admin
2. Employee

## Functional Requirements:

### R1- Manage Login

Description: Verify User login credentials and proceed

Input: Login Credentials.

Output: Home Page

Exception: If user login details are not valid, error message is displayed.

### R2 - Manage Employee

R2.1: Display details.

Description: Display employee details like personal information, Attendance, Income.

Input: User Selection.

Output: User Data.

### R3 - Manage Admin

R3.1: Manage Employee

Description: Admin can add new employee, add monthly attendance of the employee, and update the basic salary of the employee. Admin can also view employee data, update employee personal details, and delete the employee record.

#### R3.3.1: Add New Employee.

Description: If a new employee is joining, register him.

Input: Employee details.

Output: Confirmation message.

#### R3.3.2: Display Employee.

Description: Display employee details like personal information, Attendance, Income.

Input: User Selection.

Output: User Data.

#### R3.3.3: Update Employee details

Description: Display employee details like personal information, Attendance, Income and allow to modify it.

Input: User Selection and Data to modify.

Output: Confirmation message with Modified User Data.

#### R3.3.4: Delete Employee Record.

Description: Display employee and allow to delete

Input: User Selection.

Output: Confirmation message.

#### R3.3.5: Add Monthly Attendance

Description: Add Monthly Attendance of employee.

Input: Employee Monthly Attendance.

Output: Modified Attendance Record.

### R3.3.6: Update Employee Salary

Description: Display employee Income details and modify it.

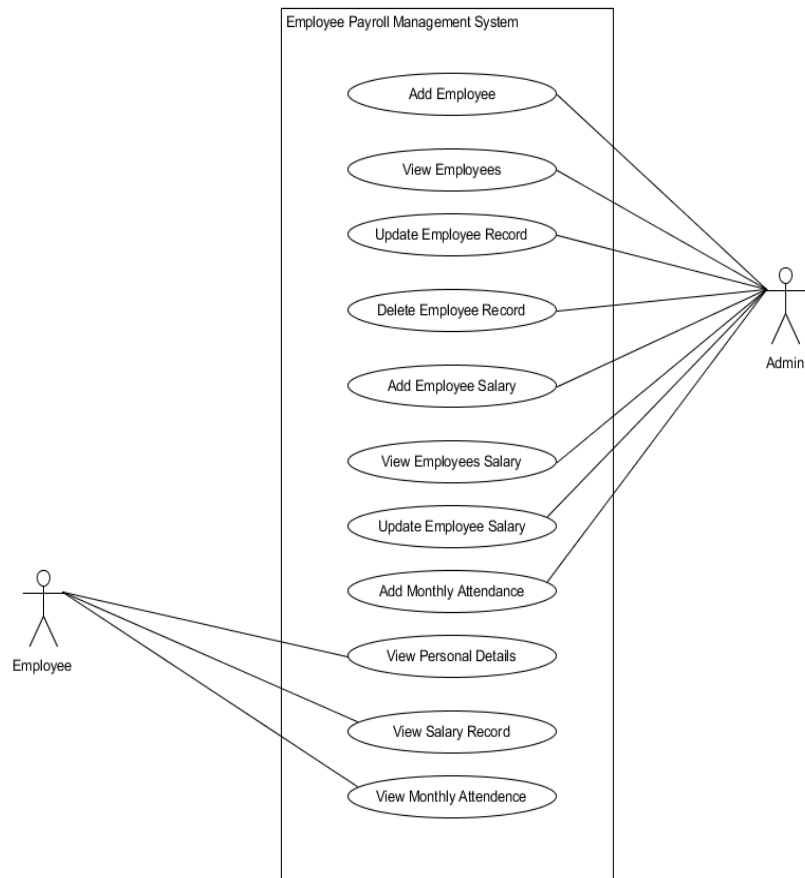

Input: User Selection and data to modify.

Output: Modified Salary Data.

# Design

## ER Diagram:

## Data Dictionary:

Personal_Details								
Sr. No.	Field Name	Data Type	Width	Required	Unique	PK/FK	Referenced Table	Description
1	EmpId	Number	10	Yes	Yes	Yes (auto-Increment)		
2	FirstName	Varchar2	15	Yes	No			
3	LastName	Varchar2	15	Yes	No			
4	MobNo	Varchar2	10	Yes	Yes			
5	Email	Varchar2	40	Yes	Yes			
6	EmpType	Varchar2	10	Yes	No			
7	Department	Varchar2	20	Yes	No			
8	Username	Varchar2	20	Yes	Yes			
9	Password	Varchar2	64	Yes	No			

Attendance								
Sr. No.	Field Name	Data Type	Width	Required	Unique	PK/FK	Referenced Table	Description
1	Sr_no	Number		Yes	Yes	PK		
2	EmpId	Number	10	Yes	Yes	FK	Personal_Details	
3	Username	Varchar2	20	Yes	Yes			
4	Attended Days	Number		Yes	No			
5	Total Days	Number		Yes	No			

Salary								
Sr. No.	Field Name	Data Type	Width	Required	Unique	PK/FK	Referenced Table	Description
1	Sr_No	Number	10	Yes	Yes	PK		
2	EmpId	Number	10	Yes	Yes	FK	Personal_Details	
3	Username	Varchar2	20	Yes	Yes			
4	Basic Salary	Varchar2	10	Yes	No			
5	Month	Varchar2	12	Yes	No			
6	Year	Varchar2	12	Yes	No			
7	Gross Salary	Varchar2	10	Yes	No			
8	Net Salary	Varchar2	10	Yes	No			

## Implementation Detail

### i) Modules Created.

Add Data: The Module that inserts user data into the database.

View Data: This module retrieves data from the database.

Edit Data: This modules retrieves the user data and allows to modify it.

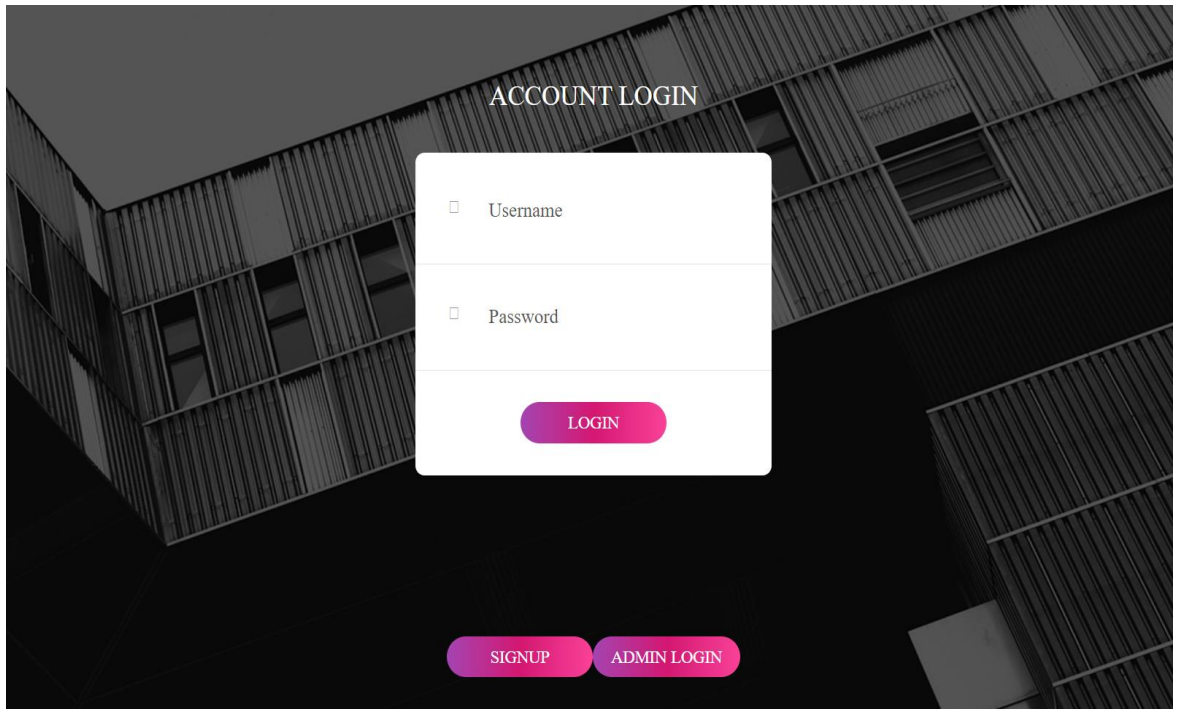

Delete Data: This module deletes data from database.

### ii) Function Prototype.

The function to calculate the salary takes basic salary of employee as input and calculates all the earnings and deductions on basic salary. This function returns gross salary and net salary.

Basic Salary	44000

Earnings	
House Rent Allowance(E)	6600
Medical Allowance(E)	4400

Earnings	
House Rent Allowance(E)	6600
Medical Allowance(E)	4400
Dearness Allowance(E)	8800
Gross Salary	63800

Deductions	
Income Tax(D)	4400
Professional Tax(D)	200
Vehicle Advance(D)	4400
Net Salary	54800

## **Conclusion**

1. The Employee record is being managed by the System. The Employee record includes employee's personal details, attendance and salary information.
2. The Admin can manage the record of all the employees.
3. Employee can view his month wise salary and also print it.
4. Employee can view his month wise attendance.

## **Limitation and Future Extension**

Employee don't have an option to view his yearly income statement.
